— *Sexual assault nurse examiner (SANE)*: A registered nurse who has an advanced education in the forensic examination of sexual assault patients.^{1,11}

— *Sexual assault response team (SART)*: Coalitions of agencies that serve sexual assault victims. Core membership for SARTs typically includes victim advocates, law enforcement officers, forensic medical examiners, forensic scientists, and prosecutors. Multidisciplinary SARTs work together to formalize interagency guidelines that prioritize victims' needs, hold offenders accountable, and promote public safety.^{15,16}

— *Strangulation*: Asphyxiation (ie, oxygen deprivation) characterized by closure of the air passage or vessels of the neck, resulting from external pressure applied to the neck.

— *Suffocation*: Obstruction or restriction of breathing by external mechanical forces. Suffocation does not require blunt force.⁷

— *Victim advocate*: Someone who pleads, supports, or defends the cause for the victim.²

METHODS OF STRANGULATION

— *Hanging*: Suspension from a cord or cord-like object wound around the neck.

— *Ligature strangulation*: Strangulation without suspension using some form of cord-like object.

— *Manual strangulation*: Strangulation using the hands, fingers, or other extremities.

MECHANISMS OF STRANGULATION

— *Compression of the laryngopharynx, larynx, or trachea*: Inhibits inhalation and

OBJECTIVES

After completing the exercises presented in this chapter, the student will be able to:

1. Correctly identify the anatomy of strangulation patients.
2. Identify and document injuries based on an analysis of case photographs.
3. List at least 3 vital signs that should be collected.
4. Discuss treatment instructions

KEY TERMS

- **Carotid artery:** oxygenated blood from the heart to the brain.
- **Choking:** Blockage of the airway passage by constriction of the neck, obstruction in the trachea or the larynx.
- **Hanging:** Suspension from a cord or cord-like object wound around the neck.
- **Jugular vein:** Veins transporting deoxygenated blood from the brain back to the heart.
- **Lethality of strangulation:** Odds of death as a result of strangulation.
- **Ligature strangulation:** Strangulation without suspension using a cord-like object.
- **Manual strangulation:** Strangulation using the hands, fingers, or other extremities.
- **Petechial hemorrhage:** Subcutaneous hemorrhages presenting as minute purple or
