

# STM Learning, Inc.

Leading Publisher of Scientific, Technical, and Medical Educational Resources

[www.stmlearning.com](http://www.stmlearning.com)

## WHAT DOES STM eLIBRARY DO?

In short, *STM eLibrary* simplifies access to online materials, housing *STM Learning's* visual and written content in one centralized location. Instead of spending time flipping through a stack of books or scouring the web to find reliable sources of information, you can do a simple search within the database and know the results you see are from reliable, peer-reviewed content.

### EDUCATION

STM Learning materials are already widely used in classrooms across the country. With an *STM eLibrary* subscription, instructors can easily share these resources among one another and with their students. The study features mentioned above, such as notetaking and highlighting, make it an ideal program for student use.

### HEALTH CARE

Medical practitioners engaging in both in-person and virtual consultations will find the ability to quickly locate critical information while meeting with a patient or researching a condition to be highly beneficial. Each e-book contains high-resolution images of anatomy, injuries, and diagrams that practitioners can reference during patient examinations. *STM eLibrary* also includes access to STM Learning's forensic learning series, used in SANE/SAFE certification programs and other health care trainings.

### LEGAL AND LAW ENFORCEMENT

*STM eLibrary* is easily accessible when on-the-go, making it a valuable tool for legal and law enforcement officials to reference during investigations. Its mobility also means crucial information can be readily available in the courtroom or during case preparation.

### TOPICS OF INTEREST

- Domestic violence
- Sexual and physical assault
- Fatal child neglect and maltreatment
- Societal causes of violence
- Human trafficking
- Internet sex crimes and harassment
- Preparation for court and expert testimony
- Forensic evidence collection
- Mental trauma related to violence
- Prevention

Once you have purchased your *STM eLibrary* subscription through [stmlearning.com](http://stmlearning.com), you will receive an e-mail with an access code and instructions for setting up your account.

Prices subject to change without notice.

Five Code Bundle - Five User License (Save \$255). . . . .	\$975.00 per year

### WHAT IS STM eLIBRARY?

*STM eLibrary* has transformed STM Learning's collection of over 10 000 images and 18 000 pages of clinical text into an electronic database, making essential information easily accessible in the workplace or remotely via your laptop and mobile device.

STM Learning, along with its partnership with more than 1200 authors and contributors, has dedicated itself to preventing abuse and maltreatment through research and education. Included in *STM eLibrary* is every clinical reference, photographic atlas, and piece of curricula that has been published by STM Learning over the past 28 years. By placing these resources into the hands of professionals who are in positions to identify, interpret, report, and prevent abuse, STM Learning hopes to assist in the movement to protect victims of domestic violence and child maltreatment.

With the ability to access this information anytime and anywhere, users can immediately locate critical content when they need it most. *STM eLibrary* also provides users with the means to digitally highlight content, take notes within each book, and create virtual flash cards. Pages can be read aloud by an automated program, and subscribers have the ability to securely share clips of information with other users by creating "reading assignments" within the program.
