440 pages, 603 images, with 31 contributors

Med. Response to Child Sexual Abuse ISBN 978-1-878060-12-9. . . . \$95.00 Print
ISBN 978-1-936590-10-0 \$80.00 eBook

The sexual mistreatment of children remains a difficult and often disturbing challenge for medical providers. In addition to the rapidly expanding and often counterintuitive research on genital injury and healing, clinicians are also faced with complex and frequently painful emotional issues, a need to work productively and openly with non-medical interdisciplinary team members, and the possibility of being called to give testimony in the uncomfortable and sometimes adversarial courtroom.

Medical Response to Child Sexual Abuse: A Resource for Professionals Working with Children and Families features a completely pediatric focus and adds an illustrative multimedia component. This text builds on the academic foundation of the original Sexual Assault by expanding the amount of pediatric-specific content and adding written and video "how-to" components.

The Medical Response to Child Sexual Abuse: A Resource for Professionals Working with Children and Families—Supplementary CD-ROM combines relevant data and practical solutions to identifying and treating the sexual abuse, assault, and exploitation of children in an accessible format comprised of forensic images and easy-to-use PowerPoint presentations.
