ISBN 978-1-936590-80-3. \$65.00 eBook

The all-new Child Sexual Abuse Assessment is a self-directed evaluation of child sexual abuse cases from infancy to adolescence. Forensic nurses and physicians who respond to cases of child sexual abuse will benefit from this concise instructional guide to enhanced care for survivors.

Readers will have the opportunity to assess 16 case histories of child sexual abuse, with a detailed account of each case and accompanying full-color examination photographs for reference. Each case includes a series of evaluative exercises designed to refine and reinforce readers' skills in injury identification, evidence collection, and the recommendation of treatment and follow-up care for victims of sexual abuse.

Features and Benefits:

- 16 case histories and corresponding exercises in child sexual abuse evaluation
- Authored by nationally recognized experts in forensic nursing
- Ideal for self-directed study or group instruction
- Portable and convenient
- Written for medical practitioners at every level of experience, from novice to advanced
